

### From Cyber Resiliency Services to Cybersecurity Emergency Response Services

#### INCIDENT RESPONSE

##### IR Retainer

Develop a custom retainer for your business needs to safeguard against attacks, and to reduce costs and maximize ROI.

##### Data Breach Response

Resolve emergencies quickly with LIFARS expertise and decades of experience.

#### FORENSIC INVESTIGATION

##### Digital Forensics

In-depth to discovery of root cause, complete remediation & business restoration, plus forensic evidence gathering for legal action.

##### Mobile Forensics

Progressive methodologies used to gather evidence from calls, chats, images, video, and hidden artifacts.

#### RANSOMWARE

##### Ransomware Readiness

Prevention through strategic audits, security awareness training, and red team real attack simulations.

##### Ransomware Forensic Response

Examine digital evidence and compromised systems for any forensic artifacts of sensitive data exfiltration.

##### Bitcoin Payments

Even with remediation options, some choose to pay the ransom. LIFARS can advise you through these hard times, including payment.

#### MANAGED RESPONSE & REMEDIATION

##### Threat Hunting

Detect threats, including advanced or targeted attacks that have bypassed existing perimeter controls.

##### Incident Response Management

Manage incidents remotely by utilizing endpoint, network, and threat intelligence advanced analytics.

##### Data Exfiltration Digital Forensics

Examine relevant enterprise systems for remanence of sensitive data staging and network transfers.

##### Incident Investigation & Response

Analyze lateral movement from indicators of compromise, conduct reverse malware engineering, and ensure containment.

##### Remediation Management

Resolve threats, strengthen your security resilience, and safely restore business operations.

#### SECURITY ASSESSMENT

##### Penetration Testing

Uncover gaps or threats, identify vulnerabilities, and prioritize your plan of action to mitigate risk.

##### Threat Assessment Test

Detect existing threats in the infrastructure and understand the threat landscape, an important part of holistic security.

##### Compromise Assessment Test

Run red team exercises to test and strengthen your Incident response plans.

##### Secure Code Review

Analyze the security of your code and generate a priority list for repair to ensure that your applications are safeguarded.

#### SECURITY ADVISORY

##### Compliance Advisory Service

Understand your vertical and geographical regulations to implement the framework of your choice, and align your policies and procedures accordingly.

##### Elite Technical Training

Empower your security team with the latest technologies, detailed insights on the evolving threat landscape, indicators of compromise, and investigative & remediation techniques.

##### User Awareness Training

Educate your user base on the importance of cyber security and the impact they can have to mitigate risk across various devices.

### LIFARS EXPERTISE

Ondrej Krehel, CEO & Founder developed LIFARS proprietary forensics methodology over a span of 20 years leading and working on High-Profile cyber security engagements and initiatives around the world. He is a Subject Matter Expert in the fields of Digital Forensics and Cyber Resiliency and holds a multitude of significant Information Security certifications including the esteemed Certified Hacking Instructor, CEI status. The LIFARS forensics' experts have experience and acknowledgment across the spectrum of the military intelligence community, and international alliances such as NATO, Interpol and Europol. We have remediated several complex high-profile investigation cases that have hit the news media headlines. Our work covers the scope of proactive and reactive engagements which often require attention of the FBI, CIA, NSA and more.

### ABOUT LIFARS

LIFARS is a global leader in Incident Response, Digital Forensics, Ransomware Mitigation and Cyber Resiliency Services. LIFARS investigates hundreds of incidents each year. Our reputation is known world-wide, and LIFARS expertise is called on by intelligence agencies such as the FBI, Homeland Security, Secret Service, and Interpol. LIFARS executes with military speed, precision, and expertise. Results matter, and your reputation is as valued as ours.

The LIFARS New York Laboratory is an industry pioneer in developing methodologies to identify indicators of compromise and threat actors, including those backed by nation states. LIFARS has investigated and responded to all types of cyber threats from intellectual property theft, extortion, hacking of celebrity social media accounts, money transfer, to serious breach attacks and sabotage from nation states.

### CERTIFICATIONS

**ACE | CCFP | CCNA | CEH | CEI | CISA | CISM | CISSP | EnCE | GWAPT | KLCP | PMP | SCJP  
CompTIA Security+ | CIPP | CRISC | PCIP | C/CISO | ITIL | CGEIT**

### Speed

Time is money. LIFARS gets you back up running swiftly and securely.

### Precision

LIFARS collects evidence for prosecution where others have failed.

### Expertise

LIFARS has elite knowledge and insight called upon by intelligence and law enforcement agencies.
